BAY STATE NURSERIES

Windsor H. Wyman

North Abington, Massachusetts

This is not a Retail Catalog, but is designed for Private Gardeners and owners of Large Estates, who buy nursery stock in quantity.

Our prices are reasonable because we sell directly to the consumer.

We have no agents. To our old customers we wish to express our appreciation of their many kind and encouraging words and large confidence, which an ever-increasing business convinces us that we enjoy.

We invite all our patrons to visit us the coming season, and it will give us pleasure to show them about one hundred acres of clean, healthy and well-grown stock as can be found in America.

In the future, as in the past, we shall aim to merit the confidence of all who place their orders with us.

Our motto is: Best Stock, Reasonable Prices, Square Dealing,—Value for Value.

THE PACKING SEASON.

The spring packing and shipping season usually opens here about the 1st of April and continues into the month of May. Evergreens may be shipped with safety until the middle of May. In the autumn we usually commence digging and packing the first week in October, and continue until the freezing of the ground, say middle to end of November.

DIRECTIONS FOR SHIPPING.

Parties ordering are requested to state explicitly the mode of conveyance by which they desire their stock forwarded.

When no route is designated, we exercise our judgment; but in no case do we assume any responsibility after packages are shipped, unless for our own mistakes. When losses occur by detention, claims should at once be made on the forwarder.

INSPECTOR'S CERTIFICATE ACCOMPANIES EVERY SHIPMENT.

CONDITIONS OF SALE.

First.—The articles on the following list will be furnished at the annexed prices only when the quantity specified shall be taken. Five hundred will be furnished at the thousand rate; fifty at the hundred rate; and five at the rate per ten. *Single plants at double the rate per hundred.*

Second.—While we exercise the greatest care to have all Trees, Shrubs and Plants genuine and reliable, and hold ourselves prepared to replace, on proper proof, all that prove untrue, *we do not give any warranty, expressed or implied*; and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the goods. **No complaints will be considered that are not made within ten days after receipt of stock.**

Third.—The prices annexed include packing and conveyance to freight station or express office, except in the bailing of large shade trees, for which we charge cost of labor and material.

Our terms are cash, unless by special agreement. We can ship by express C. O. D., when desired, with charges for collection added to the bill,—provided 20 per cent. of the amount of the order accompanies the same as a guarantee. Said guarantee will be required only from parties with whom we have no business acquaintance. All bills remaining unpaid December 1st in fall and June 1st in spring, will be subject to sight draft without further notice.

QUICK TRANSPORTATION TO NEW YORK AND BOSTON.

Shipments to New York points, leaving here at noon, travel by Fall River Line steamers, arriving in New York at seven o'clock the following morning, and are promptly forwarded to consignee.

Goods for Boston points leave here in the evening and are delivered in Boston by N. Y. N. H. & H. R. R. the following morning. We have forwarding agents in both cities who see that no delay occurs in the delivery of our goods.

Ornamental Department.

Deciduous Trees.

Under this head we include both upright and drooping forms of trees which shed their foliage in winter. For the convenience of the planter in making selection, we designate the approximate height at maturity by use of the following letters:—

Lg. Trees that attain a height of 50 feet or more.

Med. Trees that attain a height of 25 to 50 feet.

Sm. Trees that attain a height of 10 to 25 feet.

In this list we have included only those varieties which have been thoroughly tested and found worthy of general cultivation in our climate. Our trees have been several times transplanted and are furnished with a perfect root system.

Hardy Roses.

During the past few years a large number of new varieties of Roses have been introduced and sold, which have no practical value in our climate. For this reason we take great care to include in our lists only such varieties as are worthy of general cultivation.

Brief Directions for Planting, etc.

When to plant.—We recommend Fall planting if position is not too exposed. Dormant plants set in the Spring should be planted early.

Location—Roses should be planted in an open, sunny place.

Soil—Roses grow well in any rich soil. A liberal amount of manure and good cultivation will improve both bloom and fragrance.

Planting—Plant budded Roses three inches below the bud. Press earth tightly down on the roots. Water well after planting. Mulch with coarse, strawy manure.

Pruning—All Roses should be more or less pruned when planted. When pruning older plants, which should be done moderately, the operation should be performed during March.

Protection—All Hybrid Roses give better results if protected in Winter. The use of coarse manure, litter or evergreen boughs will accomplish the purpose. It should be removed in early Spring.

Hybrid Perpetual and Other Hardy Varieties.

Strong, field-grown 50 cts. each, \$3.50 per 10, \$25.00 per 100.

Herbaceous Department.

There is an increasing interest in the planting of hardy perennials and each year finds the popularity more firmly established.

Our collection contains over Six Hundred species and varieties, so that one, by making judicious selections, may stock the garden with plants which afford flowers in succession from early Spring until late Fall.

We send out only strong, field-grown plants, which will bloom the first season after planting.

STATE BOARD OF AGRICULTURE.

Official Certificate No. 32.

Boston, Aug. 27, 1904.

TO WHOM IT MAY CONCERN.

This is to Certify that I have this twenty-seventh day of August, 1904, completed the inspection of the nursery stock of the Bay State Nurseries (W. H. Wyman, Prop'r) grown at North Abington and Rockland, State of Massachusetts, and find it to be apparently free from the Jan Jose Scale and other injurious insects and diseases which might be transferred on Nursery Stock from the Nursery to the orchard or garden.

This certificate is good until July 1, 1905.

(Signed) F. H. T. FERNALD, Inspector
